

# Oralift®

Facial rejuvenation, naturally.

Oralift® facial rejuvenation is increasingly being recognised as an effective non surgical anti-ageing treatment.

“Oralift® has shown a dramatic result on a number of cases where there has been an attempt to restore a patient’s youthful facial contours.”

Dr. Maria Angelo-Khattar PHD,  
Managing Director, Aesthetica Group of Clinics.

We are now delighted to offer Oralift® facial rejuvenation in our practice.

Oralift® is a registered trademark of Added Dimension Dentistry.

Before Treatment

After Treatment

Janan Harb (below), wife of the late King Fahd of Saudi Arabia, aged 60 says: “This treatment has given me back my youthful look and restored the vitality to my face.”

# Facial Ageing

used to be regarded mainly as gravity assisted sagging of the soft tissues of the face. Recent research has shown that bony changes can also contribute to facial ageing. As we grow older, the facial muscles thin down and put less strain on the bones, and on the face the cheek bones flatten.

This results in the reversal of the lower facial triangle: in youth, the base of the triangle is in the area of the cheeks and the point is towards the chin. As jowls develop the base of the triangle drops to the jaw line and the point is towards the nose. Up to now only facial surgery could reverse this. Now the Oralift® appliance can achieve similar results but naturally.

## How Oralift® Works

By wearing the Oralift® appliance, a larger space in between the upper and lower teeth is created and the muscles alter to let the jaw rest in a new position. As they adapt to this new position, the muscles appear to become more toned and trigger the body's natural healing process, counteracting the effects of facial ageing.

When a patient is wearing the Oralift® appliance, the “exercise” being done by the muscles is being done passively. It is believed that the muscles involved in this process are not just facial but head and neck. The appliance only has to be worn for short periods.

Oralift® Facial Rejuvenation is a patented appliance, developed by a London dentist.
